

Ian Castaño

FULL STACK DEVELOPER

Profile

Full Stack Developer with 4+ years of experience building backend services, API integrations, and MVPs for e-commerce, civic tech, and community platforms. Skilled in Go, Node.js, TypeScript, JavaScript, React Native, Angular, and Firebase. Experienced in REST API design, marketplace integrations, and product-focused development, with a background in Interactive Design that helps connect engineering, usability, and business goals.

Employment History

Golang Developer, AZALEA CO, Bogotá

JAN 2024 – JUN 2025

- Designed Go backend services for a centralized e-commerce operations platform, integrating marketplaces such as Falabella and Éxito with logistics carriers and internal workflows.
- Implemented REST API modules for order synchronization, asset management, shipping coordination, and marketplace data consolidation.
- Centralized sales, logistics, and fulfillment data for SMB brands, reducing fragmented operations across marketplaces and transport providers.

Full Stack Developer, Local Governance, Bogotá

OCT 2022 – DEC 2023

- Delivered the MVP of Gobernemos, a civic engagement platform built with React Native, Angular, and Firebase for citizen issue reporting.
- Implemented mobile and web workflows for image-based reports, comments, case tracking, and review by local representatives.

Full Stack Developer, Astrocube Network

DEC 2021 – DEC 2022

- Developed Go-based monolithic backend infrastructure for community-driven digital platforms, supporting user workflows, internal tools, and platform management.
- Built web forum MVPs and large Java server-side extensions for online gaming communities, adding moderation tools, permissions, and custom interactive features.

Education

Bachelor's Degree in Interactive Design, Jorge Tadeo Lozano University, Bogota

JUL 2018 – DEC 2023

Focused on UI/UX design, front-end development fundamentals, prototyping, usability, human-computer interaction, and digital product design.
